

# MMTP – Exhibit 33 and 46, eMedNY claims data

- ◆ Data from Exhibits 33, 46 and eMedNY claims are used by DOH in the Upper Payment Limit (UPL) calculation submitted to the Centers for Medicare and Medicaid Services (CMS).
- ◆ CMS states that Medicare requires that providers maintain a charge structure that is uniformly applied to all services. The charges reported for MMTP services do not appear to be in keeping with this requirement for reporting purposes.
- ◆ Exhibit 33 – Report the actual visits; not the number of claims
- ◆ Exhibit 46 – Report the full uniform charge amount; not the reimbursed amount
- ◆ eMedNY claims – Report the full charge amount in the appropriate field on the eMedNY claims form for all claims with a date of January 1, 2011 and subsequent.
